NOTE.—This index represents the ratio of monthly clearings to the average for the months concerned during the five years 1926-1930. Seasonal fluctuations are, therefore, virtually eliminated. The trend has been smoothed out by taking a three months moving average. No allowance has been made for normal growth or change of price levels. Treasury Bill transactions are excluded.

‡ Adjusted on account of amalgamation.

§ Index not ascertainable on account of suspension of State Government banking transactions.

This reduction has been applied in calculating the rates shown in this table and footnote. † As from 1st May, 1933, the quarterly adjustments were made by applying the “all items” index in lieu of the “all houses” index. The effect was to increase the basic rates in all centres. The rate for Sydney as from 1st May, by applying the “all houses” index would have been £3 4s. 10d., and as from 1st August, £3 4s. 10d.
